

# Type in Markdown and...

## #Legal MarkdownJS

---

This web-page lets non-programmers create ``html`` files (the stuff that webpages are built from) using a few simple commands. The formatting conventions are from something called [markdown](http://daringfireball.net/projects/markdown/syntax).

It's much easier than a word processor program to do things like:

1. create numbered lists,
1. links to legal citations,
1. font-size changes, and
1. other formats.

And you can **save** your document in many different forms by clicking the `` save `` button above.

Check out how the citations below become `` links `` to the references in the text to the right. All I had to do was type in the citation. See, e.g., 35 USC 112 and D.C. Official Code 2-531. It allows you to automatically link to reported judicial opinions. See, e.g., *Citizens United v. Federal Election Commission*, 558 U.S. 310 (2010).

It also handles outlining! Check this out:

## ##Table of Contents

- I. |xref| Jurisdiction
- I. Background
- II. Statement of Case
  
- II.Factual Background
- I. Standard of Review
- I. Argument
- I. Conclusion.

So, woohoo!

No file chosen

Upload a file to load into the textarea above

**... get out beautifully rendered HTML**

# Legal MarkdownJS

This web-page lets non-programmers create `html` files (the stuff that webpages are built from) using a few simple commands. The formatting conventions are from something called markdown (<http://daringfireball.net/projects/markdown/syntax>).

It's much easier than a word processor program to do things like:

1. create numbered lists,
2. links to legal citations,
3. font-size changes, and
4. other formats.

And you can **save** your document in many different forms by clicking the `save` button above.

Check out how the citations below become `links` to the references in the text to the right. All I had to do was type in the citation. See, e.g., 35 USC 112 (<http://www.law.cornell.edu/uscode/text/35/112>) and D.C. Official Code 2-531 (<http://dccode.org/simple/sections/2-531.html>). It allows you to automatically link to reported judicial opinions. See, e.g., Citizens United v. Federal Election Commission, 558 U.S. 310 (<http://permafrast.herokuapp.com/558/U.S./310/redirect>) (2010).

It also handles outlining! Check this out:

## Table of Contents

### I. Jurisdiction

### II. Background

#### A. Statement of Case

#### B. Factual Background

### III. Standard of Review

### IV. Argument
