This is a <u>must read paper</u> if you're in the identity world. Identity is created through relationships within a context.

- paul @ 6:44 pm

I gave this <u>talk entitled Towards an eCitizen</u> at a very stimulating conference Jan 15th at the MIT Media Lab. It was organized by Dazza Greenwood, Bruce Bakis (MITRE) and others associated with the <u>eCitizenFoundation</u>.

I tried to motivate why we needed trusted user [identity] agents, multiple, contextual identities, selective disclosure, etc. by trying to answer the question "why can't dogs vote?"

It was great fun. Mary Ruddy and Charles Andres did demos of registered voter Information Cards being issued by <u>CivicID.org</u> and consumed by <u>BigDialog.org</u>.

"On the Internet, nobody knows you're a dog"
