UMKC Law School Collaboration

October 1, 2014 Dazza Greenwood

Below is the current (evolving) syllabus for the law school class that anchors the collaboration with UMKC Law School and the MIT's computational law research at the Media Lab's Human Dynamics Group.

Overview of October 1, 2014 Collaborative Creation Prototype Test

October 1, 2014 Dazza Greenwood

Overview of Live Prototype Test:

ARCHIVE OF THE CONTENT RELATED TO THE FIRST PROTOTYPE TEST:

Results of First Crowdsourced Legal Content Collaborative Collective Creation Prototype:

WINNING CONTENT:

Top Headline: Simplify and Streamline Federal Campaign Reporting

Top Blurb: Political campaigns are bogged down in outdated tracking systems, high software costs, and exorbitant legal and compliance fees. We propose designing a new database that simplifies donor tracking, integrates accounting software, and creates a bridge to FEC reporting requirements. This system will be free and allow more candidates to enter the political marketplace.

The YouTube video below is our archived recording of the live demo test of this innovative prototype. Brooklyn Law Schools' BLIP Clinic, UMKC Law School's "SPECIAL PROJECTS IN LAW, TECHNOLOGY & PUBLIC POLICY" class and many individual participants online from around the world.

Below is the information on the original live prototype page that we used on Oct 1, 2014.

Legal Education, Engagement and Entrepreneurialism: Live Test of the MIT Personal Media Collaboration Prototype

Follow Along With the Live Demo with the Video Stream Below!
The Livecast starts with a pre-show at 5:15pm Eastern today and the prototype demo/test starts at 5:30pm Eastern SHARP!

For participants in class: Follow the Hangout on the big screen in your classroom while you go to each step in this demo/prototype.

For participants joining us individually online, follow the livecaset at: Preshow-Livecast.html and keep that browser winder open while you participate in the demo so you can hear and monitor the instructions.

* If you are not part of the BLIP or UMKC or MIT participating classes you can still participate but you must sign up to be invited. Sign up at: eCitizen.MIT.edu/contact and we'll email you instructions a few minutes before the live prototype session begins.

* Wed, Oct 1st, 2014 at 5:30pm – 6:00pm Eastern.

* In collaboration with the Brooklyn Law School BLIP Clinic and UMKC Law School. For more information and to participate, see: MIT.edu/Law (coming soon if it is not live when you click) or signal your interest at our contact form linked below:

Join us in the co-creation of MIT's new "Computational Law" research initiative… sign up for our email list to be notified of activities, research, publishing, events and opportunities to contribute:

Rate Push for Meth

Using the series of proposed content, ratings and sequenced workflow to integrate modular contributions, the resulting "article" for publication eventually at the launch of MIT.edu/Law (in a "hot topics" column) was generated, refined and concluded! The following Crowdsourced Legal Content was the result of this expiramental prototype test:

Tutorial: Collaborative UnPanel Prototype

September 29, 2014 Dazza Greenwood

Below is an initial rough video cut of the MIT Personal Media Platform "UnPanel" implementation. This is how to use the PMP design flow as a way to enable "unconference" style self-organization for a panel discussion. The participants develop the agenda for the panel in one round. The PMP design regards a "round" as a process with two steps: a) developing and proposing something (panel topics, in this case) and b) evaluation and rating the proposals.

This is the simplest use case for the PMP, which is designed to orchestrate multiple such rounds in a sequence to enable much more complex and powerful collective solutions. The basic concept is to use this method in a context that will result in a "ready to use" artifact (a draft panel topic list or agenda, in this case). The pairing of this process with tasks and workflows carefully crafted to result in actionable solutions is a cornerstone of the idea.
